

ARTEMIS **UAV**

Not just another Drone manufacturer

We enable cost-efficient aerial threat neutralization systems designed for modern asymmetric warfare.

ABOUT US

ENGINEERED FOR MODERN WARFARE

ArtemisUAV develops AI-driven autonomous robotics systems engineered for modern battlefield operations. Every platform is designed for precision, built for endurance, and developed for operational superiority in the most demanding environments.

Engineered for **Precision**. Built for **Endurance**.

Developed for operational superiority.

CORE CAPABILITIES

- AI Autonomy
- Encrypted Communications
- Modular Payload Systems
- Real-Time Data Feeds
- Rapid Field Deployment
- Multi-Platform Integration
- GPS-Denied Navigation
- Localized AI Model Training

Drone-in-a-Box

Autonomous persistent surveillance and rapid-response deployment system engineered for 24/7 continuous operation and seamless infrastructure integration.

USE CASES

- Perimeter security
- Area surveillance
- Critical infrastructure monitoring
- Routine inspections

OPERATIONAL PROFILE

FLIGHT ENDURANCE

Up to 45 mins

PROPULSION

Electric

MAXIMUM ALTITUDE

Up to 3,000 m

COMMUNICATION RANGE

Up to 30 km / unlimited
via 4G

CRUISE SPEED

Up to 70 km/h

PAYLOAD OPTIONS

Daylight / Thermal / night vision
Camera

DOCKING

Auto Docking

AUTONOMOUS FEATURES

Auto Launch & Auto Land

NAVIGATION

Waypoint Navigation

AI FEATURES

Anomaly Detection
Track & Trace

SYSTEM INTEGRATION

Existing Infrastructure

SYSTEM READINESS

24/7 Operation

**All specifications are customizable.*

Stingray R3H

Extended-range ISR platform combining VTOL flexibility with fixed-wing efficiency

USE CASES

- Wide Area Terrain Scanning
- Deep-zone reconnaissance
- Convoy aerial escort
- Maritime coastal monitoring

OPERATIONAL PROFILE

FLIGHT ENDURANCE

Up to 3 Hour

PROPULSION

Electric

MAXIMUM ALTITUDE

Up to 3,000 m

RANGE

Up to 300-350 km

CRUISE SPEED

Up to 70- 90 km/h

PAYLOAD OPTIONS

Daylight / Thermal Camera
Laser Range Finder (optional)
Payload Dropper (optional)

NAVIGATION

Waypoint Navigation

AUTONOMOUS FEATURES

Auto Launch & Auto Land

AI FEATURES

Integrates Into Existing
Infrastructure And
Provides Realtime Data

**All specifications are customizable.*

Raptor R4

Autonomous aerial platform engineered for precision payload deployment in dynamic battlefield environments. Designed for controlled, high-accuracy release with real-time trajectory intelligence and environmental compensation.

USE CASES

- Precision payload deployment
- Tactical support operations
- Elevated drop missions
- Coordinated strike support

OPERATIONAL PROFILE

FLIGHT ENDURANCE

Up to 35 mins

PROPULSION

Electric

MAXIMUM ALTITUDE

Up to 2,000 m

COMMUNICATION RANGE

Up to 15 km

DEPLOYMENT MODE

Precision Release

SEQUENTIAL DROP

Supported

PAYLOAD CAPACITY

Up to 4.5 KG

AUTONOMOUS FEATURES

Auto Launch & Auto Land

AI FEATURES

Real-Time Trajectory Analysis
Vision based Target locking

**All specifications are customizable.*

AI-Interceptor

Autonomous aerial interceptor engineered for high-speed neutralization of aerial threats. Designed for rapid target acquisition and real-time threat tracking with autonomous pursuit intelligence.

USE CASES

- High-speed aerial interception
- Kamikaze drone neutralization
- Airspace denial operations
- Coordinated multi-threat response

OPERATIONAL PROFILE

FLIGHT ENDURANCE

Up to 25 mins

COMMUNICATION RANGE

Up to 8 km

PAYLOAD CAPACITY

Up to 300 grams

PROPULSION

Electric

DEPLOYMENT MODE

Pursuit & Strike

AUTONOMOUS FEATURES

Autonomous Pursuit & Interception

MAX SPEED

Up to 230 KM/H

AI FEATURES

Vision based Target locking

Shahed

(Under Development)

Autonomous long-range loitering munition engineered for one-way precision strike missions. Delivers high-impact payload through terminal dive with GPS-independent guidance.

USE CASES

- Long-range loitering strike
- High-value target elimination
- One-way kamikaze engagement
- Deep-penetration area denial

OPERATIONAL PROFILE

FLIGHT ENDURANCE

Up to 2.5 hours

RANGE

Up to 250 km

PAYLOAD CAPACITY

Daylight / Thermal Camera
Up to 3 KG

PROPULSION

Fuel

NAVIGATION

GPS Navigation / GPS
Denied Navigation

AUTONOMOUS FEATURES

Auto Launch & Auto Land

MAXIMUM ALTITUDE

Up to 3,000 m

MAX SPEED

Up to 100 KM/H

AI FEATURES

Smart Target Locking

**All specifications are customizable.*

A5 Kamikaze FPV

Compact FPV strike drone built for high-agility, close-range precision engagement in confined environments, with real-time pilot-guided terminal control.

USE CASES

- Pilot-guided precision strike
- Close-range engagement
- Rapid deployment
- Urban/confined operations

OPERATIONAL PROFILE

FLIGHT ENDURANCE

Up to 15 mins

PROPULSION

Electric

MAXIMUM ALTITUDE

Up to 300 m

RANGE

Up to 1.5 km

WARHEAD TYPE

Mortar / Shaped Charge

MAX SPEED

Up to 70 KM/H

PAYLOAD CAPACITY

Up to 500 grams

DEPLOYMENT MODE

Pilot-Guided Terminal Strike/
Autonomous Strike

FRAME SIZE

5" inch carbon fiber

**All specifications are customizable.*

A7 Kamikaze FPV

Mid-range FPV strike platform offering increased range and payload while maintaining agility for flexible tactical operations.

USE CASES

- Pilot-guided precision strike
- Extended-range engagement
- Increased Payload Capacity
- Urban & semi-open operations

OPERATIONAL PROFILE

FLIGHT ENDURANCE
Up to 20 mins

PROPULSION
Electric

MAXIMUM ALTITUDE
Up to 800 m

RANGE
Up to 3 km

WARHEAD TYPE
Mortar / Shaped Charge

MAX SPEED
Up to 100 KM/H

PAYLOAD CAPACITY
Up to 3 KG

DEPLOYMENT MODE
Pilot-Guided Terminal Strike/
Autonomous Strike

FRAME SIZE
7" inch carbon fiber

**All specifications are customizable.*

A10 Kamikaze FPV

Long-range FPV strike drone designed for sustained missions and high-impact precision strikes on distant targets.

USE CASES

- Long-range precision strike
- High-impact payload delivery
- Extended endurance
- Open-area operations

OPERATIONAL PROFILE

FLIGHT ENDURANCE

Up to 25 mins

PROPULSION

Electric

MAXIMUM ALTITUDE

Up to 2,000 m

RANGE

Up to 10 km

WARHEAD TYPE

Mortar / Shaped Charge

MAX SPEED

Up to 120 KM/H

PAYLOAD CAPACITY

Up to 5 KG

DEPLOYMENT MODE

Pilot-Guided Terminal Strike/
Autonomous Strike

FRAME SIZE

10" inch carbon fiber

**All specifications are customizable.*

A15 Kamikaze FPV

Heavy-class FPV strike system engineered for maximum payload and long-range, high-impact missions against strategic targets.

USE CASES

- Heavy Payload strike
- Long-range Engagement
- Maximum Endurance
- High-value target operations

OPERATIONAL PROFILE

FLIGHT ENDURANCE

Up to 30 mins

PROPULSION

Electric

MAXIMUM ALTITUDE

Up to 3,000 m

RANGE

Up to 25 km

WARHEAD TYPE

Mortar / Shaped Charge

MAX SPEED

Up to 130 KM/H

PAYLOAD CAPACITY

Up to 10 KG

DEPLOYMENT MODE

Pilot-Guided Terminal Strike/
Autonomous Strike

FRAME SIZE

15" inch carbon fiber

**All specifications are customizable.*

Swarm Drones

Autonomous multi-unit aerial system engineered for coordinated group attacks on high-value targets.

USE CASES

- Coordinated group target engagement
- Air defense saturation
- Simultaneous multi-point strike
- Autonomous swarm coordination

OPERATIONAL PROFILE

FLIGHT ENDURANCE

Up to 45 mins

AI FEATURES

Decentralized Swarm Intelligence
Collaborative Target Assignment

PAYLOAD CAPACITY

Up to 1 KG

FORMATION TYPE

Up to 45 drones
formation

FORMATION MODES

Line / Pincer / Saturation

AUTONOMOUS FEATURES

Auto Launch & Formation
Flight

DEPLOYMENT MODE

Coordinated Swarm Strike

MAX SPEED

Up to 80 KM/H

**All specifications are customizable.*

TRAINER DRONE

Low-cost resilient training drone engineered for skill development, tactical simulation, and controlled pilot instruction.

USE CASES

- Pilot skill development
- Tactical maneuver training
- Indoor flight drills
- Operator certification programs
- Simulation-based exercises

OPERATIONAL PROFILE

STRUCTURE

Impact-Resistant Housing

PROPULSION

Electric

MAXIMUM ALTITUDE

Up to 100 m

PROTECTION

Full Propeller Guard System

**All specifications are customizable.*

GPS Denied Navigation

(Under Development)

Autonomous navigation module designed to maintain positional awareness and flight accuracy in GPS-denied, jammed, or spoofed environments.

USE CASES

- GPS-denied operations
- Anti-jamming resilience
- Electronic warfare zones
- Urban canyon navigation
- Signal-disrupted missions

OPERATIONAL PROFILE

MODE

Vision-Based Localization

GPA DEPENDENCY

Not Required

TAKEOVER TRIGGER

Automatic on Signal Loss

SENSOR FUSION

IMU + Optical + Barometric

TERRAIN MAPPING

Tile-Based Image Comparison

POSITION CORRECTION

Real-Time Recalibration

Flapping Bird

(Under Development)

Low-visibility surveillance system designed for covert intelligence gathering in sensitive or high-risk zones.

USE CASES

- Covert reconnaissance missions
- Urban intelligence gathering
- Low-visibility surveillance
- Sensitive zone monitoring
- Perimeter observation tasks

OPERATIONAL PROFILE

FLIGHT ENDURANCE

Up to 20 mins

PROPULSION

Electric

MAXIMUM ALTITUDE

Up to 200 m

COMMUNICATION RANGE

Up to 5 km

PAYLOAD OPTIONS

Daylight/Night Vision
Camer

MAX SPEED

Up to 40 KM/H

AI FEATURES

Anomaly detection Vehicle/
Person Track & Trace Custom
Features (Optional)
